

Harvest Bins

The Capp Plast Harvest Bins are perfect for all applications involved with grapes

(harvesting, bin tipping, hand picked processing and sorting).

The Capp Plast Closed Side Harvest Bins are single injection moulded. Double wall construction on the corners and centre columns and reinforced ribs on the bottom guarantees higher compression strength. These robust bins are resistance to UV and low temperatures making them ideal for the harsh NZ working environment, proven over many years in the wine industry. They are the ideal heavy-duty container for transportation and storage.
