Vaucher Beguet

TVE

Description

- Made on stainless steel.
- Robust frame on anti vibration leveling jacks. 4 rotating 2 with brakes
- 2 vibrators
- The harvest arrives at the entrance of the vibrating table on the slotted area, spreads and moves forward continuously

400V/TRI/50Hz or 600/480/240/208/TRI/60Hz – 0.75 KW

Manual harvest - Mechanical harvest

- The TVE is used to level the input before a sorting table or a destemmer
- The TVE 750/1900 allows 2 Operators for manual sorting
- The vibrations above the slotted area remove the dries particles from the clusters: small vegetal mater, shot berries, petioles, insects...
- Juice is filtered and collected in a tank (with exhaust pipe)
- The waste is removed automatically by the self cleaning filtration drain (standard)

Destemmed harvest

- The TVE is used to level the input before a sorting system
- The harvest is leveled. The slotted area removes the juice and the small vegetal mater, shot berries, seeds...
- Juice is filtered and collected in a juice tank (with an exhaust pipe)
- The waste is removed automatically by the self cleaning filtration drain (standard)

Optional devices

- Raised frame up to 1600 mm
- Fixed tipping device
